

First of all I do not live in Fenton, Michigan. That's just my address because of the way rural mail delivery works. Because of this Zip code mess my Satellite TV provider(Direct TV) can only give me local channels from Flint-Bay City-Saginaw. My focus has always been on Detroit local channel programming. That's all I can receive with my roof mounted antenna. I've tried moving my roof antenna around and I can't receive a clear picture from any of the Flint-Bay City-Saginaw channels. My next door neighbor, 50 feet south gets Detroit local channels because he is in the next zip code area. Why is Neilsen dictating what TV channels I get to watch? This situation is unfair to me and I'm sure there are many others in rural areas who have the same problem. What is the FCC doing to rectify this unfairness? Please fix this and/or tell me how I can receive the programming of MY choice.
